

## NOB7L Residual Current Circuit Breaker >>>

- Combined electronic type RCD/MCD device
- High breaking capacity:10kA
- Line voltage-independent tripping
- Compatible with standard busbar
- Twin-purpose terminal(lift/open-mouthed)above and below
- Switch position indicator red-green
- Switching toggle(MCB component)in colour designating the rated current
- Busbar positioning optionally above or below
- Comprehensive range of accessories suitable for subsequent installation

### Electrical technical data

Standards	IEC / EN 61009	
Tripping time	Instantaneous	
	Type G 10 ms delay	
Rated voltage	230V 50Hz	
Operational voltage range	196-253V	
Rated tripping current	30, 100, 300mA	
Rated non-tripping current	0.5In	
Sensitivity	Type A and type AC	
Selectivity class	3	
Rated breaking capacity	10kA	
Rated current	6-40A	
Characteristic	B,C	
Maximum back-up fuse(short circuit)	100A gl(>10kA)	
Endurance	electrical life	>4000 operating cycles
	mechanical life	>20000 operating cycles
